**Re Item V**

**Novelty**

Beverages, including coffee-beverages, with added caffeine are known in the art (see description of present application and documents of search report).

Furthermore, dry, single-serving beverage preparations, such as powdered instant beverage preparations (for example: dry sports- or refreshing drink preparations) are known in the art.

However, single serving sachets with conventional caffeine-containing coffee solids and additional caffeine containing solids, for use in preparing a liquid beverage, and as further defined in claim 1 are new over the prior art.

**Inventive step**

GB 124309 and FR 2039157 are relevant documents of the prior art. Patent specification GB 124309 is about a coffee preparation, which may be in extract form, whereto additional caffeine is added. FR 2039157 is about a canned, liquid coffee extract with added caffeine (see claims 1 - 5).

The problem to be solved can be formulated to provide an instant beverage, with an acceptable taste, which provides a high, controlled amount of caffeine.

Both prior art documents disclose coffee extracts, which are in a liquid form (see GB 124309 line 26-29). Whereas the present application specifies that coffee solids are used. Additionally, GB 124309 is silent about the form of package, which is in the present application a single-serving sachet of a rupturable material.

No document of the prior art suggests in an obvious way to provide a caffeine delivery system, based on conventional caffeine-containing coffee solids and additional caffeine-containing solids from a natural source, and further specified as in present claim 1 .

Therefore novelty, inventive step and industrial applicability (that is: preparation / use of

a caffeinated beverage as described in the application) are acknowledged for claim 1 and the dependent claims, including the related use-type claims (Art. 33 PCT).

**Other (Art. 6 PCT)**

- 1 The claims need to be renumbered (currently there are two claims with number 13 and two claims with number 16).
- 2 Claim 5 is contradictory: the claimed 'caffeine-containing solids' apparently can not be 'decaffeinated tea extracts' or 'decaffeinated coffee extracts'
- 3 The reference letters a), b), c), and 3) in claim 12 are not defined.
